ATTACHMENT 1

Figure 1, attached, shows the location of the facility on which the hazardous waste sites are located.

Figure 2, attached, shows the location of the hazardous wastes site on the facility. Arrow A shows the former location of the decommissioned underground waste storage tank, which has since been removed.

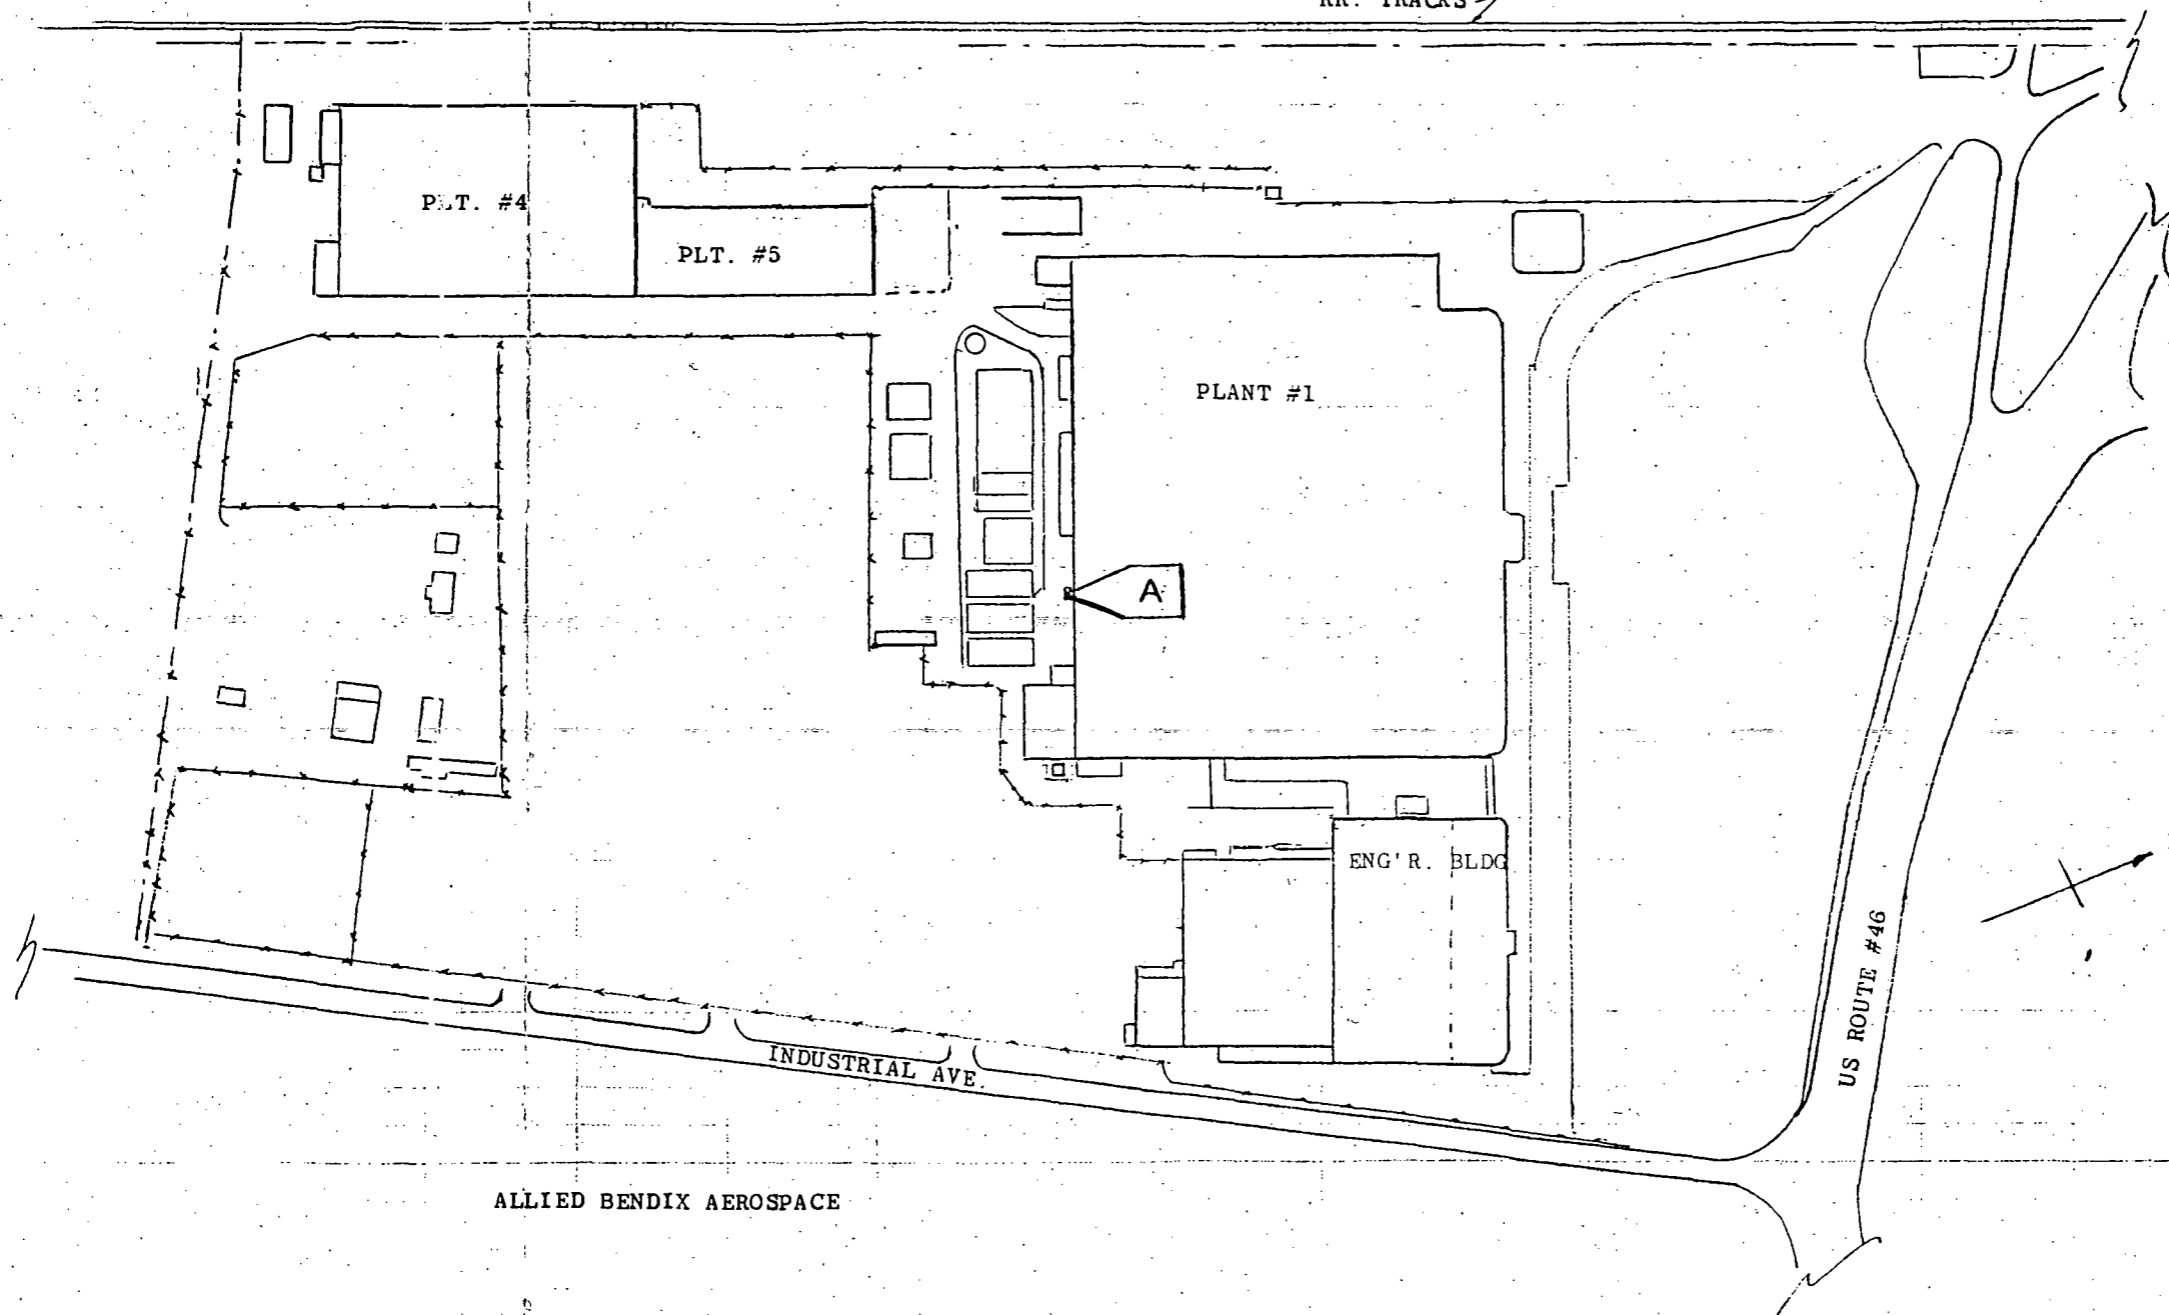

ATTACHMENT 2

During recent operations to remove an old decommissioned underground storage tank which was used until approximately 1972, tests of liquid and sludge found in the tank revealed the presence of certain volatile organic compounds in low concentrations (total volatile organic compound concentration of under 200 ppm). Isolated test samples taken of soil in the vicinity also revealed the presence of varying concentrations of volatile organic compounds and heavy metals.

The tank and its contents, together with some of the contaminated soil, have been removed and disposed of in accordance with the EPA regulation for disposal of hazardous wastes. Further tests are planned on the soil and groundwater in the area.
